DETAILED ACTION

1. This action is final.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 3682

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 15-28, 36-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,725,973.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious variations of breadth and scope.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 15-19 and 23 is rejected under 35 U.S.C. 102(b) as being anticipated by Heller (3,565,213).

With regard to claims 15, 19, 22, Heller discloses a lubricator to apply lubricant to a strand (36 – reference figure 4)) as it is pulled through a conduit, the lubricator including an external coupling feature (33) to mate with a corresponding coupling feature (contact area of bolt head (33) where it hits bushing (31)) of a bushing (31); the strand comprises an insulated electrical wire or the like; the lubricator also includes a second external coupling feature (34) configured to mate with a corresponding coupling feature of the

Art Unit: 3682

conduit (contact area of bolt head (34) where it hits bushing (32)); a lubricator to apply lubricant to a strand as it is pulled through a conduit.

With regard to claim 23 Heller discloses a lubricator to apply lubricant to a strand (20) as it is pulled through a conduit, the lubricator including a coupling feature (14) to mate with a corresponding coupling feature (corresponding threads) of a bushing; the strand comprises an insulated electrical wire or the like; the coupling feature of the lubricator comprises threads, the threads comprise external threads; the lubricator also includes a second coupling feature (15) configured to mate with a corresponding coupling feature of the conduit; the second coupling feature of the lubricator comprises threads; and an internal thread (15) to mate with a corresponding external thread (13) of the conduit.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 16-18, and 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heller (3,565,213).

Heller shows the claimed invention having external attachment portions as described above.

But Heller does not show threads in figure 4 (relied upon in above rejection).

Art Unit: 3682

However, Heller does show an embodiment in figure 1 where threads are used to secure two independent bushings.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the two embodiments of Heller such that the bushings were threaded and then secured with an external lock bolt in view of the teaching of Heller for the purpose of providing a extremely secure connection of the bushings.

Allowable Subject Matter

6. Claims 36-38 are allowed.

Response to Arguments

7. Applicant's arguments with respect to claims 15-23 have been considered but are moot in view of the new ground(s) of rejection.

Note the Terminal has not yet been supplied. Applicant is reminded that prosecution cannot conclude until all rejections are overcome. (See Applicant's remarks, page 1).

Conclusion

8. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.

CFR 1.136(a).

Certificate of Mailing

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to: Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450 (Date) Typed or printed name of person signing this certificate: Registration Number: **Certificate of Transmission** I hereby certify that this correspondence is being facsimile transmitted to the United States Patent and Trademark Office, Fax No. ()_____ - ____ on _____. (Date) Typed or printed name of person signing this certificate: Registration Number: Please refer to 37 CFR 1.6(d) and 1.8(a)(2) for filing limitations concerning facsimile transmissions and mailing, respectively. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37

Art Unit: 3682

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Fenstermacher whose telephone number is 571-272-7102. The examiner can normally be reached on 10:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on 571-272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
